

Help develop materials to reduce unnecessary antibiotic prescribing in GP surgeries.

We are looking for 15 people including parents and carers, to take part in two workshops (3 hours each) at **Imperial College London**, on **27 March 2019** and **18 June 2019**.

The 1st workshop, involves viewing and discussing draft versions of materials to help reduce unnecessary antibiotic prescribing in GP surgeries (including use of back-up/wait-and-see antibiotic prescriptions) and suggesting ways they can be improved. The 2nd workshop, involves viewing and discussing later versions of the same materials, which we hope to refine for use in a research study. You must be aged 18 or over and fluent in English.

You will be reimbursed for any travel expenses up to a total of £30. You will also receive a £25 voucher as a thank you for your participation in each workshop (£50 in total).

We will provide information around participation prior to the workshop and the research team will be on hand on the day.

Please contact Dr Aleksandra Borek for more information
Tel 01865 289337 or email Aleksandra.borek@phc.ox.ac.uk

The NIHR Health Protection Research Units in Healthcare Associated Infections and Antimicrobial Resistance at University of Oxford and Imperial College London are working together on a large research project to help reduce antibiotic use and antibiotic resistance: Improving the uptake and SusTainability of Effective interventions to promote Prudent antibiotic Use in Primary care (STEP-UP) More information can be found here: <https://www.expmndm.ox.ac.uk/stepup/home>. The above workshops are part of the STEP-UP Implementation study. IRAS Project number: 251103. Ethics Reference number: R59812/RE001. Chief Investigator: Dr Sarah Tonkin-Crine
